c. Information Systems (IS) Division

In today's world, business drives technology. Different elements of business which need to work in cohesive manner need different technologies. For a seamless, integrated operation, it is must to integrate various application software across multiple platforms. The rich experience of various technologies & business processes makes us the right choice for any such integration. Integration may be across any ERP, Business Intelligence Design, Project Management, PLM, Web Enabled; Software Integration can be across various Databases or Hardware platforms or Mobile Devices.

We have full fledged software development center in which we are focusing on developing various kind of software's. We develop the software's using Structured Systems Analysis methodology. Structured development processes in line with SEI CMM level practices having inbuilt defect analysis & prevention are in place to ensure the delivery of Quality Software:

- Function Point Analysis method for estimating the size of the project.
- Joint Reviews with customer at periodic intervals.
- Module wise periodic installation of the system and acceptance from customers.
- Configuration Management.
- Intra-project communication channels.
- Training of the team members.

The details of various in-house developed software products and solutions are available at www.sakshamerp.com

We are professionally managed company having a well structured organizational chart and KRA (Key Result Area) performance based system for the employees.

The enterprise provides various services under each functional head reporting to MD through General Manager.

Frequent MRM are conducted to review the progress and take corrective measures.

Company invests on a large sum in training its employees to the best practices in industry and consultancy services.

Miles Stone

Company, since beginning had used in-house technology development as a key for serving its clients. The following are the important milestones:

2000-2001: Company designed in-house ball bearing plant for Myanmar. The entire project was designed developed and technology transfer documents prepared by us. This projects was successfully commissioned in Myanmar in 2002.

2001-02: Company became first in developing low cost Enterprise Resource Planning software called “SakshamERP” exclusive for MSME segment it was well received in the market and implemented in some of the modules in Golcha group, Rajasthan.

2002-03: Company developed online ISO 9001:2000 implementation software through which any industry /corporate/institution can implement the international Quality Management Systems ISO9001:2000. This software was developed for giving handholding support to enterprises for implementation of ISO 9001:2000 without the

support of any consultant or outside advisor. Around 50 clients all over India used this software and successfully implemented the ISO9001:2000 in their organization.

2003-04: Company focused on development of sector specific software solutions for Jewelry, Real Estate industry and International Trade and developed through own technology following software:

1. Jewele pro
2. Real CRM
3. InterTrade

These software were well accepted in the markets and Otrac Limited China, Pukhraj Gems and Finetech Real estate were the first client to use these technology software.

Till now the real estate software is used by almost every Real Estate company in Rajasthan.

This year company also started looking for International markets and ventured in China and received China Government request for carrying out Advanced Software training in China and accordingly we started working in China.

2004-05: This year due to home grown technology and established name in providing turnkey consultancy services many international MOU were entered notably with Scanstra Norway and KDQC China.

2005-06: Received Royal Government of Bhutan assignment through international bidding process for Investment Opportunity Study in Bhutan.
Received Norway government assignment for quality evaluation of Indian IT Companies.
Developed Real CRM software on latest technology platform to offer this software online without CD and unlimited licenses .

2006-07: Received two more assignments from Royal Government of Bhutan.
Developed software for the first time in India for Catering industry viz. CaterPro.

2006-07: Real Estate Software Real CRM found increasing acceptance in the market and most of the builders and developers started using this software in Rajasthan. Developed Turnkey project Management expertise to bid for international consultancy assignments on its own strengths.

2007-08: Shortlisted in Millennium Project at Cape Verdi among tough international competition, however, could not get the final contract due to logistics reasons. Signed three year local ICT enterprises development through incubation support project in Kenya with Kenya Industrial Research & Development Institute, (A Government of Kenya organization). The project commenced in October 2008 with support from UNIDO and ICT Board, Kenya

Looking to the increasing micro finance sector, developed a specially tailor-made software LMS (Loan Management Software) to cater the micro finance loan segment.

Adopted Industrial Training Institute (Women) Jaipur under PPP from Government of Rajasthan to upgrade the facilities to world class with aim to facilitated employable and meaningful education to women.

Its Managing Director Mr. Ajay K Gupta joins the Institute Managing Committee of ITI as Chairman.

The availability of employable human resource is a big issue and challenge, to cover this area, we have diversified into employable education and launched **Professional Academy** in October 2008 and are now working as Program Support Agency of Rajasthan Knowledge Corporation Limited (A Government of Rajasthan Enterprise). The company has 130 Information Technology Gyan Kendras's across the state of Rajasthan and offering Government recognized computer choruses RS-CIT and soft skills development courses .

Prepared detailed feasibility reports for prestigious clients like J K Cement Ltd, Nucleus Software, Genpact Limited.

2009-10: Appointed as Project Management Consultant for Alwar Auto Component Cluster project by Government of Rajasthan for helping the local auto component cluster in Alwar to become globally competitive through cluster based intervention and capacity building approach.

CDAC (A Government of India enterprise) has appointed the company as Teaming Partner for FMS (Facility Management Support Software) at Rajasthan's biggest hospital Sawai Man Singh Hospital, Jaipur.

Innovation and Diversification of Services

Our main motto is to give turnkey consultancy solutions to SME sector since beginning and for this purpose Kamtech since its inception started diversifications of services like Quality Management Services and offered its MSME clients ISO9001: 2000, HACCP and ISO 22001 consultancy support and till date it has given successfully consultancy services to around 100units all over India.

Apart from Quality Management systems, the other segment in which Kamtech diversified was use of IT for MSME segment and developed its flagship Software brand Sakshamserp which was priced very competitively developed by home grown technology it gave good competition to existing MNC in this segment.

The availability of quality man power to MSME is a big issue and challenge to cover this area, Kamtech diversified into employable education and launched Professional Academy in October 2008 and is now working as Program Support Agency of Rajasthan Knowledge Corporation Limited and has already set up around 130 Information Technology Gyan Kendras's across the state of Rajasthan and offering Government recognized computer courses RS-CIT and soft skills development courses .

Maintenance of Plant and Machinery:

Our main plant and machineries areas computers hardware, printers and various software, we have a system of AMC for computer hardware and a replacement policy in line with updating of the computer systems as the time demands.

The company has all relevant software original licenses.

The company has weekly date security check system in place for the various viruses and software programs. Every week backup data is captured in external hard disc and kept in secured place.

The company has its own servers leased out and important software coding programs and highly secured confidential data is kept on the password protected servers.

We are member of Microsoft Empowerment Program and subscribe its latest license software on annual rental basis.

Overall upkeep

Since we have ISO 9001:2000 implemented the overall upkeep follows the standard operating procedures for each activity (SOP's) with responsibility and authority assigned to each employee for specified activity for upkeep of the files, softcopies and hardcopies, and all recourses of the company.

Employees Welfare Measure:

As per the ISO 9001:2000 manual in practice there is regular training programs for each employee for increasing their work efficiency and knowledge base.

Employees are given annual leaves and promotions based on their performance appraisal system. The employees are given annual bonus depending on their performance.

All employees are given bonus. The lower level staff like Guard, Gardener are given uniform and maintenance allowance. For the women employees there is relaxation in the leaving time and they can leave office one hour before.

There are annual staff family get together for increasing the acquaintance of the family members with the company. Every month “ Employees of the month is announced officially and a cash reward is given to him/her.

The company also gives weightage in employment of SC/ST women and physically challenged employees and has equal opportunity of work.

Modernization of the enterprise

In last three years company has invested a close of Rs 2.5 million in modernization of offices and computer systems.

The modernization is regular exercise. The company regular updates the hardware and software programs to serve its clients better and better every day.

The modernization focuses mainly on the replacement, new purchases, replacement with energy saving equipment like all CRT were changed with LCD screens over last 2 years.

Because of the investments in modernization a high level Kenyan Government officials team visited company in November 2008 and has given a three years contract to Kamtech for ICT enterprise development in Kenya.

For energy conservation, a structured system of replacement of computers monitors with LCD monitors is already done, besides the all the tube lights are replaced with electronic choke and CFL in all the offices.

All the fans and Air conditioner are star rated in the office.

Employees are given instructions as and when they leave their workspace they should switch off lights and this message has been printed and displayed prominently in each office.

The used paper is used in the back before it is finally destroyed.

Some of the important projects completed at national and international level are given here along with detailed bio data of the promoter.
